

# Phoenix Demo Cell Project

Date: November 2013

## The Brief:

To build a two robot demo cell for client demonstrations.

This includes the following activities:

- Mechanically install the two robots.

- Mechanically install the guarding supplied by Metalmesh Ltd.

- Electrically install and commission the two robots and the turntable for the KR210.

- Install and commission the two spindles.

- Electrical design of the control cabinet and it's installation.

- Carry out the software demonstration for the clients.
